

Lead Installer

The lead installer is a key person in the completion of every project and is critical to the success of the Garage Living Install team. This individual ensures the project is completed up to the standards of Garage Living and exceeds all client expectations. The lead installer will oversee all work on each project while managing a team. The ideal candidate will have experience in project management, possess strong technical skills, be a confident communicator, and have excellent attention to detail.

Responsibilities include:

- Preparing for each project by reviewing orders and loading the materials onto his/her truck.
- Ensuring all company tools and vehicles are operated properly and in a safe manner.
- Onsite planning and execution of the project according to the documents prepared by the office and designer.
- Responsible for communication with the client as a matter of daily operations or to discuss onsite issues. Managing issues onsite is a critical element in client satisfaction – the lead installer must manage these situations in a professional, courteous, and productive manner to ensure the clients' complete satisfaction.
- Responsible for managing the assistant installer on his/her team – direction of work to be completed, ensuring tasks completed meet the quality standards of Garage Living, and overall supervision of the other installer onsite.
- Performing installation – The lead installer is also responsible for work to be completed onsite as part of the scope of work on each project. The lead installer will typically perform the more difficult or skilled tasks while delegating the less involved elements to the assistant. This position is similar to a working foreman who contributes to the actual work being completed while supervising other employees and quality of workmanship. Lead installer should be viewed as a “working foreman” that actively participates in the installation while managing the project/site.

Experience:

- Minimum of 5 years' experience in construction, carpentry, concrete, or related fields.
- Project management experience.
- Has worked in teams and independently to complete projects.
- Has a vehicle and valid driver's license – this is critical to ensure the employee is punctual and can operate the company vehicle.
- Clean driving record.
- A true problem solver.
- Excellent communication skills.
- Energetic and passionate about each and every project.
- Clean background/criminal record.
- Ability to manage an assistant installer – including directing, supervising, and coaching.

- In excellent physical condition necessary to perform the physical labor required to complete installations.
- Punctual
- Sets a good example for assistant installer
